

Mini Pressure Transmitters

Anderson's HA "Mini" sanitary pressure transmitter is specifically designed for critical measurements in fractional size lines and is available with an autoclaveable option. The product can be ordered with 3/4", 1", or 1-1/2" Tri-Clamp® connections as well as our CPM fitting. This eliminates the need for reducers or adapters, thus reducing hold-up volumes in small lines. Internal zero and span adjustments and easily accessible test points greatly simplify calibration and validation. 316 "L" stainless steel wetted parts are electro-polished to an R_a =8. Finally, since it's an Anderson "Pharmaceutical Series" product, every transmitter includes a calibration certificate and permanent tag at no charge. Complete specifications appear below, with an ordering matrix and dimensions on the reverse.
