

Sani-Tech® Gooseneck Faucets

Non-Metallic Sanitary Faucet Systems

Sani-Tech® Sanitary Gooseneck Faucets utilize the same nonmetallic contact services as our sanitary piping systems. They are available in unpigmented natural Polypropylene or PVDF materials and meet (and/or) surpass FDA, USDA, and USP standards. They are specifically designed for Ultra Pure Water Systems within Biotechnology, Pharmaceutical, Microelectronics and related R&D laboratory areas.

These innovative designs are equipped as a standard with a Sanitary Tri-Clamp end connection and are purposely designed to integrate with Sani-Tech's Sani-Pro® piping system and components. However, a variety of connective technologies are available as options including; male or female pipe threads, socket fusion, and compression fitting styles. In addition, our engineering team is available to help custom design a faucet that will meet your specific requirements.
