

Heater Hose

Electrically Heated Sanitary Hose Assemblies

Now available on a "built to order" basis: Electrically heated hoses. Available on virtually all hose assemblies manufactured by Sani-Tech West, this optional electrically heated trace feature is designed to maintain the internal temperature of the conveyed media regardless of hose installation. These units typically are simple, rugged, economical and resistant to moisture and chemicals, with maximum operating temperatures in the range of 450°F (232°C). Thermostats, thermistors and additional sensors may also be incorporated into their design, as well as a wide variety of external protection offered from silicone, FEP heat shrink, silicone/fiberglass firesleeve, stainless steel anti-kink casing, polypropylene braided, and PVDF braided chafe guards.

BIOPHARMACEUTICAL PRODUCTS

Insulated, Silicone Rubber Covered Electrically Heated Hose Assemblies

Features/Benefits:

- Can be used with virtually any hose assembly made by Sani-Tech West
- Small outside diameter eliminates bulky hose and allows flexibility
- External analog & digital temperature controllers available
- Custom fabrication available
- Variety of end fittings available
- FDA approved materials of hose construction

Typical Applications:

- Hot glues
- Filling machines
- Food casings
- Food processing machines
- Food lines
- Hot Waxes
- Pharmaceutical applications
- Cosmetics
- Outdoor applications where temperature must be maintained
