

Hose Storage Stations & Racks

Standard & Custom Fabricated Stainless Steel Hose Storage Units

HSU-100S

Sanitary Hose Storage Stations are the perfect hose racks for organizing sanitary hose assemblies. All stainless steel construction provides excellent corrosion resistance. The ergonomic design allows hose assemblies to be stored vertically for drainage.

Sanitary Hose Storage Units feature horizontal pegs for holding sanitary gaskets, sanitary clamps and stainless steel hose adapter fittings. The pegs are angled so that clamps, adapters and gaskets will stay securely mounted.

Hose racks allow 100% drainage. When used properly hoses will not exceed bend radius, and are stored in accordance with manufacturers recommendations.

Custom units are designed & built to meet your specific needs, contact us today to learn more!

BIOPHARMACEUTICAL PRODUCTS

Features/Benefits:

- **Conforms with FDA and 3A regulations for storing hoses**
- **Top quality stainless steel construction**
