

The SureView™ labeling system offers color coding and text identification to your process hose assemblies - Up to 5 lines of text depending hose size, with 10 background colors available for each line. SureView labels are electrostatically printed on a polyolefin film, permanently adhered to the hose cuff and covered with a fluorinated ethylene propylene (FEP) heat shrink, providing a water tight seal which ensures readability and label integrity over the lifetime of the hose.

### Label Sizing & Options:

**New – Assembly Serial # placement.**  
(Optionally, this can be left off the label if specified.)

The length of the text and the number of lines available are dependent on the hose size (O.D.). Smaller hoses have a minimum of 3 lines; larger hoses have a maximum of 5 lines. Please contact our technical sales representatives for more information on how the SureView™ labeling system can help with your process.

### Available Colors:

SureView label with a green stripe.
