

Carboy Closure Systems

The Bio-Simplex™ Carboy Closure System features an EZ Top® Closure Assembly made from C-Flex® pharmaceutical grade resin and tubing, engineered to ensure an unobstructed fluid path, extremely low levels of extractables and a secure elastomeric seal against plastic, glass and metal surfaces. The EZ Top® Assembly includes C-Flex® tubing with standard plug end fittings, a Bio-Simplex™ Flex Joint™, 0.2 µM vent filter and cap. Economically designed for single use, the system eliminates cleaning and contamination from repeated use. It is easily used with sterile connecting devices and thermal tubing sealers. We offer standard 2 and 3 port configurations to fit a wide variety of carboys in sizes from 5 to 20 Liters. Available as a complete packaged Bio-Simplex™ Carboy Closure System (EZ Top® Assembly, carboy and cap), either gamma irradiated or non-irradiated; or as individually packaged EZ Top® Closure Assemblies. Custom designs, materials, sizes, packaging and other options—such as quick disconnect devices, Luer connections, heat-sealed ends or alternate carboy materials—are available on request.

Bio-Simplex™ Container Closure System featuring the EZ Top® Assembly and cap.
