

Sani-Tech® Sani-Pro® Bender

Bending System for Sani-Tech® Micro Size Tubing and Components

The **Sani-Pro Bender** quickly and evenly heats Sani-Pro Sanitary Rigid Tubing with or without ends and allows the forming of 45°, 90° and 180° bends. Complete micro systems can be created or enhanced with Sani-Pro Micro Tubing formed to the requirements of your present system.

Materials include Sani-Pro-K (PVDF) and Sani-Pro-T (polypropylene), available in metric size tubing. Sani-Pro Sanitary Micro Tubing Systems are fully integratable with larger diameter Sani-Tech sanitary rigid, flexible and silicone tubing systems and components.

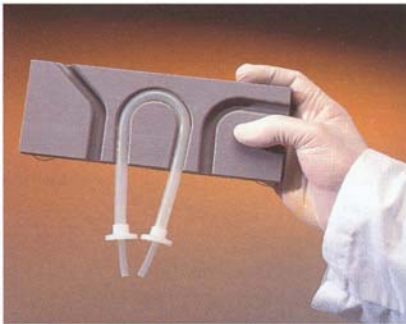

STEP ONE

Place the tubing into the heater block.

STEP TWO

Remove the tubing from the heater and place it into the desired bend angle.

COMPLETE

The tubing is ready to be connected to Sani-Tech flexible or rigid sanitary systems.
